Reference: Case Number 2007-00436

I am resubmitting my letter of protest since I now have the case number. As a customer, I am opposed to the monthly increase in sewer rates as recently requested by the Farmdale Development Corporation. From looking at their "Application for Rate Adjustment" it appears that the increase they received in 2006 should enable them to meet their expenses. The increase in collection fees that they list is questionable and should be open to negotiations with the collecting agency. It is hard to tell if a rate increase is actually justified since it is impossible to determine if their revenue has been managed efficiently.

Thank you for your attention to this matter. Please keep me informed of future developments and decisions.
